# UNILEVER RENEWABLE ENERGY GOALS

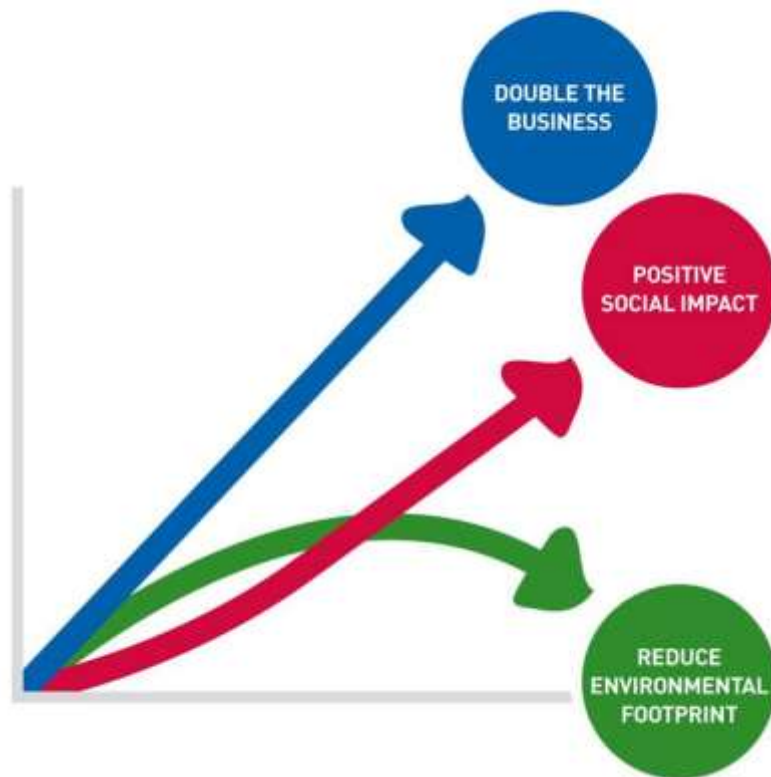

STEFANI GRANT  
SENIOR MANAGER, EXTERNAL AFFAIRS &  
SUSTAINABILITY

# OUR VISION:

**DOUBLE THE SIZE OF OUR BUSINESS,  
WHILE REDUCING OUR ENVIRONMENTAL  
FOOTPRINT AND INCREASING OUR  
POSITIVE SOCIAL IMPACT**

# CARBON POSITIVE BY 2030

## *To do this, we will:*

- *Source 100% of our total energy across our operations from renewable sources by 2030*
- *Source all our electricity purchased from the grid from renewable sources by 2020*
- *Eliminate coal from our energy mix by 2020*
- *And in order to achieve our target of ‘carbon positive’ by 2030, we intend to directly support the generation of more renewable energy than we consume and make the surplus available to the markets and communities in which we operate.*

# HOW ACHIEVING GOALS

- In the U.S., partnership with NRG to build on-site renewable energy at all facilities by 2020.
  - » *Laws and regulations regarding third party PPA's is making this challenging.*
- In the transition toward onsite renewable power generation in the U.S., 100 percent of our power consumption is offset by a wind farm in Langford, Texas.
